Summary

I'm Manish, a passionate developer specializing in building intelligent automation solutions and scalable applications. I combine problem-solving skills with technical expertise to transform ideas into production-ready systems that deliver real business value.

Education

Gorkha Secondary School +2 • 12
Computer Science Tulsipur-6,Dang

https://www.gsstulsipur.edu.np/

Projects

Secure Online Exam System
Developed an online examination platform using React and Firebase supporting 500+ concurrent users with secure authentication, randomized MCQ exams, real-time proctoring, and analytics.

Multi-Platform Social Media Scheduling System
Built a production-grade social media automation platform to schedule, queue, and publish videos across multiple platforms using a scalable backend architecture with job queues, OAuth integrations, and real-time monitoring.
https://github.com/manis-sharma/Multi-Platform-Social-Media-Scheduling-System/

Personal PC Assistant
Built an AI-powered voice and text-based desktop assistant in Python that automates system tasks such as file management, application launching, web navigation, and real-time system monitoring, achieving 95% command recognition accuracy.
